

Storing Passwords

Always forgetting passwords on multiple accounts? Storing passwords has never been easier! For this tutorial, we will be running through Keeper.

1. Open your web browser and go to keepersecurity.com.
2. To get the program, click the yellow icon located on the home screen.

3. This button will take you to the "Create Your Keeper Account" page. Once you fill out all the information and accept the Terms of Use, click the yellow icon that says, "Create Account." It may take a few seconds to load the next page.

4. Store passwords by clicking the "Setup" tab on the top right bar. Click "New" to create a new record on file. You can also choose to "Import" or "Backup" data.

The screenshot shows the Keeper application interface. The top right bar contains several icons: Account, Setup (highlighted with a red circle), Settings, Import, Backup, and Logout. The Setup form is open, displaying the following fields:

- Folder: A text input field.
- Title: A text input field.
- Login: A text input field.
- Password: A text input field with a password strength indicator.
- Login URL: A text input field with the value "https://".
- Custom Fields: A section with an "Add Field" button.
- Files and Photos: A section with an "Add Files or Photos" button.
- Notes: A text area.

5. Keep in mind this is only a 30-day free trial. In order to upgrade, click on "Account" on the top right bar and select the green "Upgrade" icon.

The screenshot shows the Keeper application interface with the Account tab selected in the top right bar. The Account page displays the following information:

- Account Type**: 30-Day Free Trial
- Expiration Date**: Dec 8, 2015
- Upgrade**: A green button to upgrade the account.

6. A similar process can be followed with other password storage programs. If you are familiar with other programs, such as 1Password, type in the program on your search engine. Make sure to research the features of the packages each company offers, so you understand what you may (or may not) be paying for when you download a password storage program.
