

Google Translate

Want to experience new languages? You can easily translate words and phrases by following a few simple steps. This tutorial covers the Translate app on an iPhone, iPad, or Android. Many of these steps also are applicable to the online translator site (www.translate.google.com).

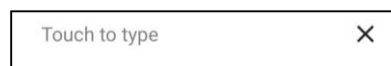

1. Open the Translate app.

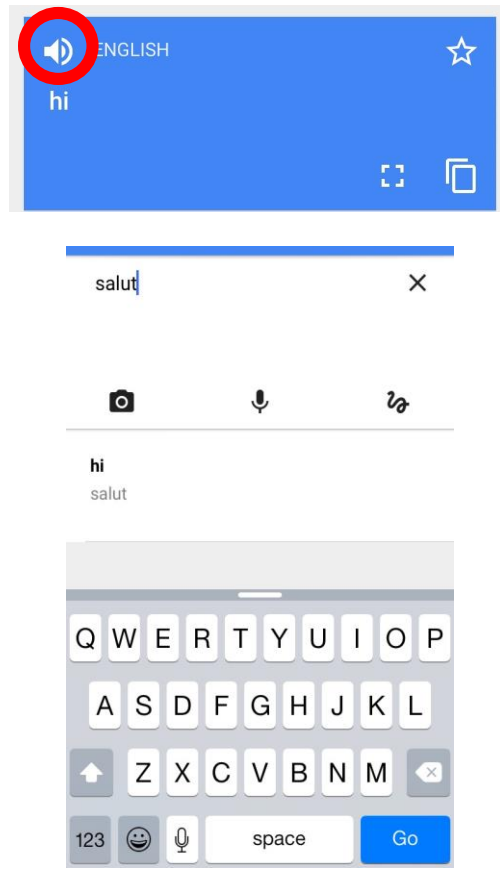

2. Select language translation from the top bar by clicking on the current language. A screen with many different options will appear for you to choose from.

3. Modes of Translations:
 - a. Select "Touch to type" and begin typing words on the keyboard.

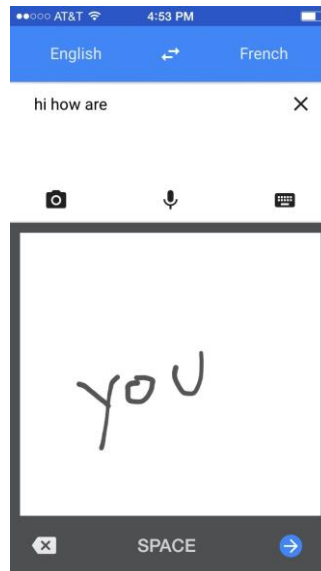

Click "Go" to enter the word/phrase and view the translation. The sound icon on the top left corner of the translation bar allows you to listen to the translation in the selected language.

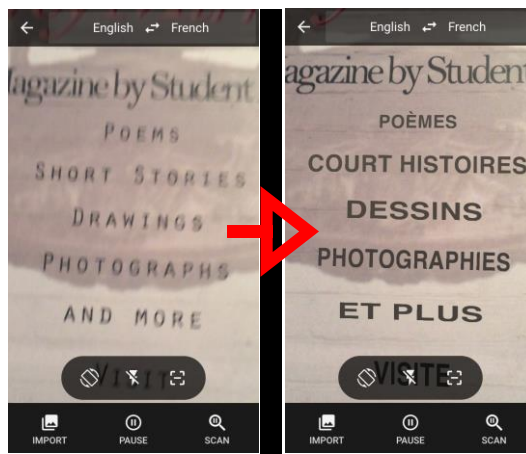

- b. Write words onto the screen by selecting the drawing icon. This option is very similar to typing; but, now you can physically write the words onto the screen.

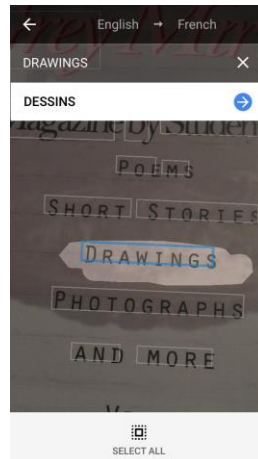

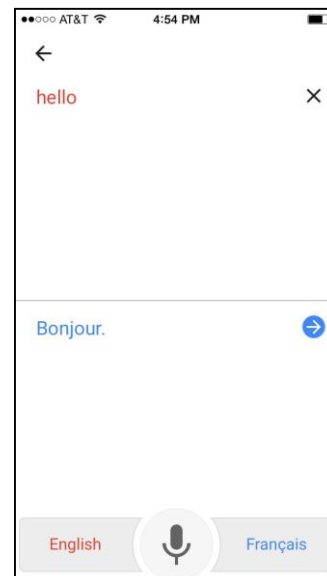

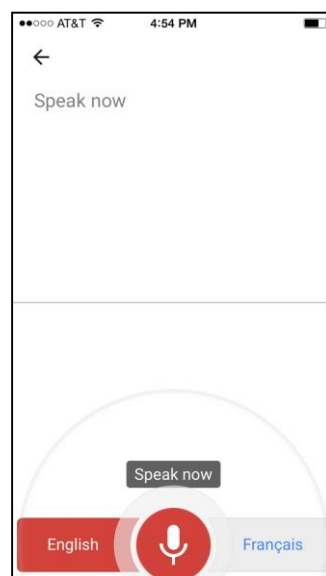

- c. Translate sections of books or magazines by taking picture of the selected items. Select the camera icon. Once the text is aligned with the box, select scan.

Highlight particular text to view certain translations.

- d. Select the microphone icon to translate spoken words. Click on the microphone and begin speaking. The translation will both be typed onto the screen and spoken aloud.
